

April 9. 1937

Mr. W. A. Wilson, Secretary and Treasurer,
Boulder Irrigation & Water Development Co.,
Escalante, Utah.

Dear Sir:

In reply to your letter of April 7 inquiring about how a Water Commissioner is appointed, you will please refer to Chapter 5 of the irrigation law contained in the pamphlet enclosed herewith, from which you will observe that such are appointed by the State Engineer or by the court.

The court appointment can only come about, however, when a stream is in litigation, which I take it, from what you say in your letter, is the case on the stream in your vicinity.

Yours very truly,

T. H. Humpherys
STATE ENGINEER
